

Play value

This collection of elements encourages a play with light, shadows and colours that is open to change and manipulation. This play will be different depending on the age of the person that interacts with it, his/her abilities and motivations. The results will also change depending on the weather, the hour of the day or the season of the year. The 360° rotating poles offer kids and adults the possibility of overlapping colours and shadows, and creating new stories and situations. „Shadowplay“ promotes a physical interaction, but also the symbolic and the exploratory play that invites us to understand how and why things happen around us.

Fundamental characteristics

- Unique and original
- Attractiv design
- Incentive for playing: Curiosity

Recommended for

- School children
- Young people
- Adults
- Older people
- Public play areas without supervision, such as playgrounds, parks or similar

Shadowplay, round
Shadowplay, square
Shadowplay, amorphous
