## Play value

Those playing on the Forest Fountain system can experience a wide range of spatial and sensory effects of the medium water as a result of their own physical activities. The height of the masts and length of the pipelines enables the water to achieve the greatest possible spraying effect, while the jets and rotors create different, continuously changing shapes and structures. The contrast, created by the strictly geometrical masts and pumps, contributes to the aesthetics of the overall design.

## Recommended for

- School children
- Public play areas without supervision, such as kindergartens, schools, after- school programmes or similar - Swimming pools without supervision, such as outdoor pools, adventure pools or similar

## Rotors and jets

Order No. 5.27030 / 5.27530

## Low Collision Disc

Spraying area 2 m , width 0.50 m
Order No. 5.27031 / 5.27531
High Collision Disc
Spraying area 4 m , width 1 m
Order No. 5.27032 / 5.27532
Vertical Jet
Spraying height up to 10 m , radius 2 m
Order No. 5.27033 / 5.27533
Spiral Rotor
Spraying area radius 2.5 m
Order No. 5.27034 / 5.27534 Vertical Star Rotor
Spraying area 14 m , width 1.50 m
Order No. 5.27035 / 5.27535
Horizontal Star Rotor
Spraying length $\varnothing 10 \mathrm{~m}$, radius 5 m (reducible)

Order No. 5.27036 / 5.27536
Umbrella Jet
Spraying area radius 3 m
Order No. 5.27037 / 5.27537
Reservoir
Water Umbrella
Spraying area radius 2 m

Order No. 5.27031 High Collision Disc

Order No. 5.27035 Horizontal Star Rotor, Photo © Paul Upward

Order No.. 5.27034 Vertical Star Rotor

5.27035 / 5.27535

5.27036 / 5.27536

## Technical information / Components

## Pumps

Order No. 5.27010 / 5.27015 / 5.27016 Long Handle Pump with valve One Pump cylinder with stainless steel mechanism on concrete well, $\varnothing 110 \mathrm{~cm}$, depth of installation approx. 60 cm pump swipe of ash wood Ø 9 cm , length 2.30 m , weight approx. 900 kg , depending on type of distribution station (single or double), 3-way valve with pan bar handle and direction arrow, made of stainless steel / plastic, height 40 cm . Connection to main water 2.5-6 bar, connection thread 1 inch inside, compression proof diameter 1 inch, water requirement approx. $15 \mathrm{l} / \mathrm{min}$

## Order No. 5.27110 / 5.27115 / 5.27116 Long Handle Pump with water reservoir

As above, but in addition connection to main water max. 6 bar

Order No. 5.27020 / 5.27025 / 5.27026 Pump See-saw with valve system Two Pump cylinders and stainless steel mechanism on concrete well, $\varnothing 110 \mathrm{~cm}$, depth of installation approx. 65 cm , seesaw beam of larch, length 4 m , optimized concealed bolt head, hand grips of stainless steel (glass bead blasted), fall height $\leq 1 \mathrm{~m}$, weight approx. 950 kg , depending on type of distribution station (single or double), 3-way valve with pan bar handle and direction arrow, made of stainless steel/plastic, height 40 cm , connection to water as above water requirement approx. $20 \mathrm{I} / \mathrm{min}$

Order No. 5.27120 / 5.27125 / 5.27126 Pump See-saw with water reservoir As above, but in addition connection to main water max. 6 bar

## Masts

Order No. 5.27030-5.27037
Larch wood with steel foot, height approx. $4 \mathrm{~m}, 18 / 21 \mathrm{~cm}$

Order No. 5.27530-5.27537
Cap of stainless steel or complete masts made of stainless steel tubes $\varnothing 133 \mathrm{~mm}$

Foundation $80 \times 80 \times 80 \mathrm{~cm}$,
Excavation depth 110 cm , edges to be rounded if sand and gravel is used

Supply line between pump and mast, fabric hose 10 m and hose connector, included supply line to be laid in empty conduit such as drainpipe or flex pipe $\emptyset 80 \mathrm{~mm}$, not included in delivery supply line with $2 \%$ gradient to pump concrete well for draining during period of frost

## Order No.

5.27001-5.27537 / 5.27002 / 5.27003

## Planning information

The masts and pumps should be arranged so that it is possible to observe the fountain effect when pumping. Accordingly, the masts with the smaller spraying radiuses should be positioned closer, and those with a larger spraying radius further away, at the edge of the space. The distance to the masts and between them should be 3-6 m. The effect of the sunlight and the contrast with darker backgrounds such as trees or the flat faces of buildings plays an important role here for the optical effect. In the case of higher spraying

Masts made of stainless steel, powder-coated

heads, the prevailing wind direction should be taken into consideration. The surfacing of the ground should be firm or graveled and be provided with a well working drainage. The water supply and the system must be drained during frost periods. Sensitive parts such as pump valves must be removed and stored in a frost-free location.

Individual solutions for the water supply must be devised, depending on the plans Up-to-date details on the connection for the water supply and other technical information is available to download as a table at our website
www.richter-spielgeraete.de.

5.27020

The Forest Fountain is a very complex play structure, we recommend the consultation and planning by our team.

The pumps are also available with programmable rinsing for flushing the pumps and masts.
